Flowgrammable
Driving the Next SDN Generation

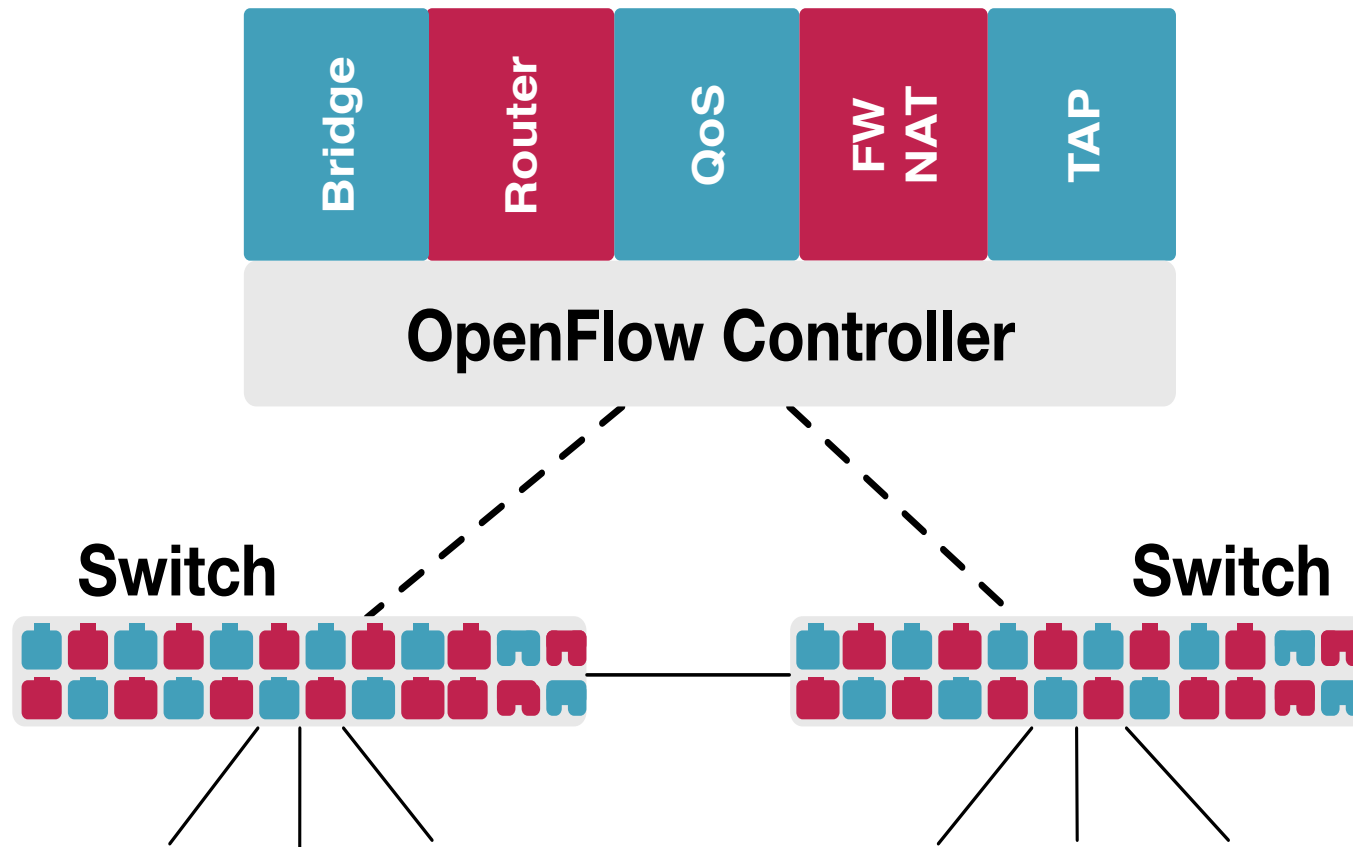

About Flowgrammable.org

- What we do
 - Conduct focused research
 - Curate selected research
 - Develop/maintain open source projects
- Who we are
 - Academics: profs, students, post-docs
 - Industry: engineers, architects, operations
- Commitment
 - Research is published
 - Software is released open source

Definition of an Abstraction

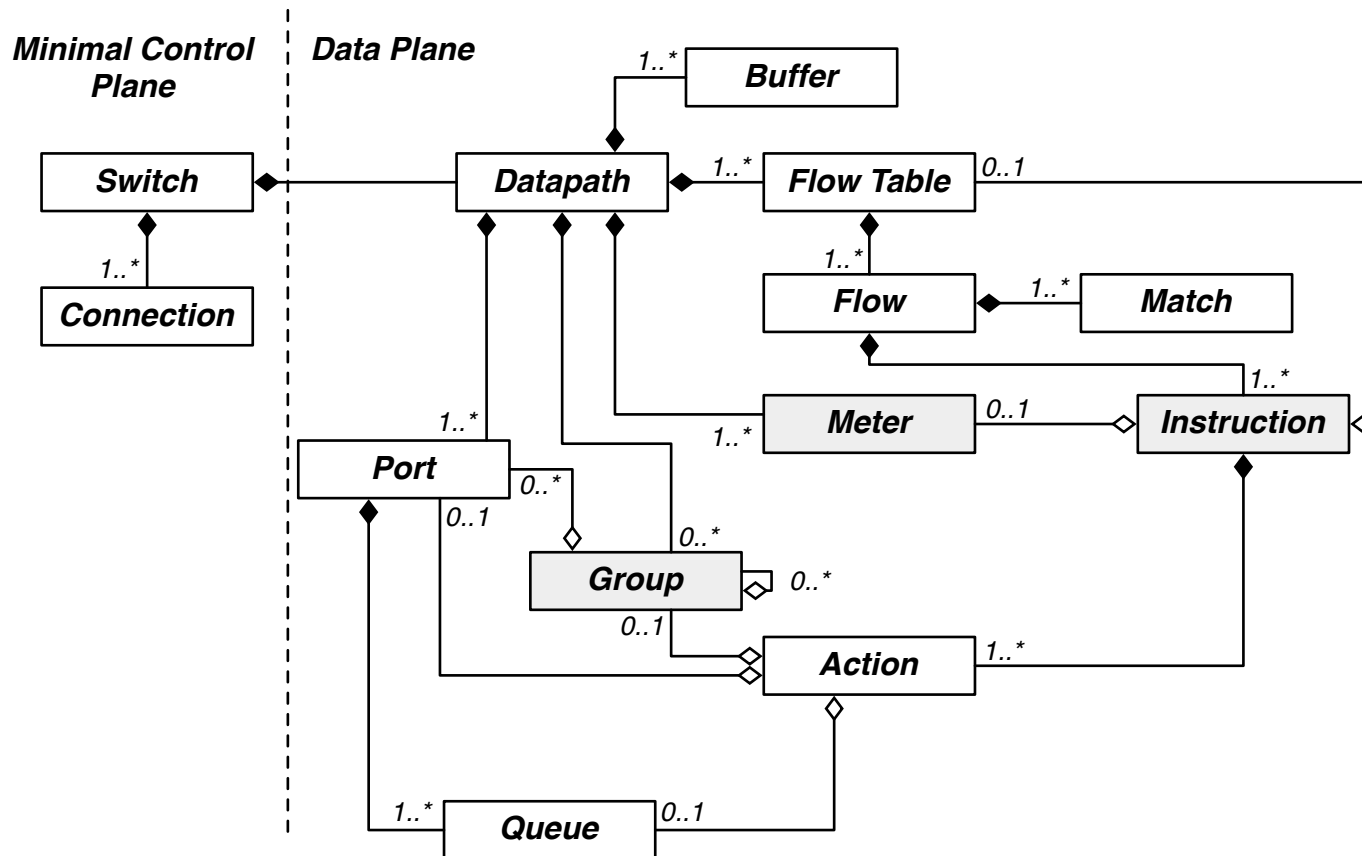

Flowgrammable
Driving the Next SDN Generation

What are data plan abstractions?

- Port – sources and sinks packets
- Flow Table – match packet to a flow and apply flow policy
- Meter – polices or shapes packet flows
- Group – provides egress processing

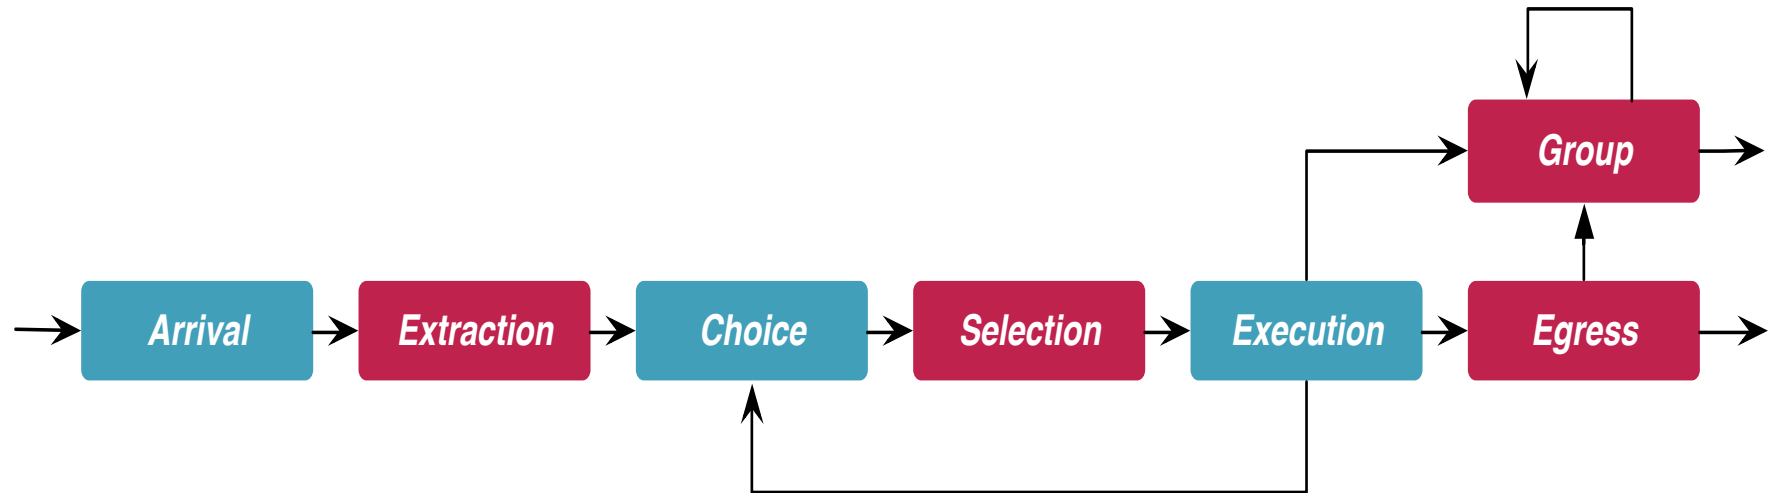

Generalized OpenFlow data model

Flowgrammable
Driving the Next SDN Generation

Dataplane Pipeline

Driving the Next SDN Generation

Online Training

- Recorded lectures
- Available from INE online - \$299
- Course Outline
 - SDN Overview
 - OpenFlow Abstractions
 - OpenFlow Dataplane
 - OpenFlow Protocol
 - Pica8 Whitebox Demonstrations
